

# Yeastar MyPBX Client Addon

MyPBX Client is an application coordinated with MyPBX that connects your PC and IP phones. With MyPBX Client, you can perform various operations including check extension status, manage contacts, voicemails, and CDR of extension, realize click-to-call and call popup, send instant messages between extensions, initiate a conference call, and create a call task, etc.

## Presence

Visual representations of other extensions' availability permits you to instantly know if a person is online and not in a call so that available for a real-time conversation.

## Handle Calls

Make, terminate, and transfer calls on the Client.

## Call Popup

Be productive on each call, as you get information of the caller from the popup window at the first moment.

## Contacts List

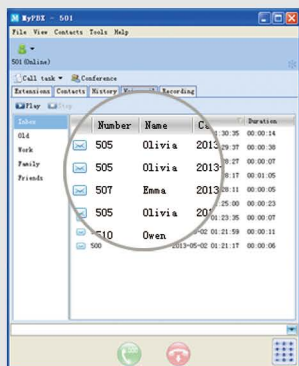

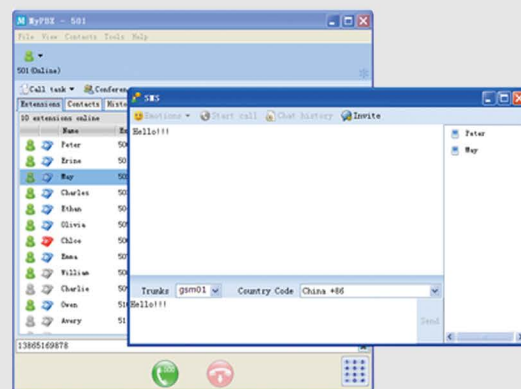

Manage your contact list by adding, editing, deleting, grouping, and checking your contacts.

## Instant Messaging

Send and receive instant messages, initiate group chat, send SMS to mobile phone, and check chat log. An immediate method that breaks down barriers and complement communication is readily at hand.

## Click to Call

Quickly connect to individuals: just a click on the extension or the contact's number to start a call. The contact's information is also displayed.

## Access to Voicemail

Play back and manage your voicemail at any time on MyPBX Client.

## Conferencing

With user-friendly conferencing interface, start a conference call clicks away.

## Call Task

Schedule call task. Specify the number and time you want to make a call; either set it as a reminder or place the call directly.

## Call Logs

Detailed records of all inbound and outbound calls including missed calls with call time and duration are displayed. Call history with a specific contact can also be checked.

## Runs on Windows

Fully support Windows OS.
